NANCY S. HUGHES
To my husband, Greg, who understands the real me, pulls me in when I get carried away, puts things into perspective, and then helps me fly—to get carried away again, but with direction.

And to my children,

Will and Kelly and now Miss Molly Catherine, who pop in for random tastings, total chaos, and tons of opinions—welcomed opinions.

Annie, who finds the pure joy in good food and the "coziness" of a good conversation—over that good food.

Taft, who still patiently comes by to "unblink" the flashing clock and other such technology adjustments I don't have time—nor bother—to deal with.

You've all found the deep passion that steers your heart in each of your lives and in each of your professions—what true accomplishments. (Of course, I take sole credit for showing you the way.) I love you!

Acknowledgments

To Monica Davis, Robin Brinker, Liz Dixon, and Melanie Crane for all the long hours helping to "get it just right"; having mind-swirling conversations; and caring so much for the sake of the book, the sake of the recipe, and the sake of not having to test it one more time!

To Judy Wilcox, for letting me pick her "nutritionally genius" brain and helping me make simple sense out of it all!

To my editor, Sarah Pelz, for having a great thought, digging deep and popping up with an even greater idea, and working with me to make this book happen. Thanks, Sarah, for your collected, calm personality to match my collected but over-the-top, excitable personality. Teamwork at its best!

Thanks for helping to bring it together!
Introduction

Our schedules are so crazy, and eating healthy is not always at the top of the priority list. We tend to let the healthy aspect slide a little, along with our quality of food. So our good intentions tend to slip through the cracks, along with our health. It can get away from us one bite at a time. By the same token, we can improve our quality of health one bite at a time!

With this book, it's actually enjoyable to stick to a healthy, low-calorie meal plan. Just because you're trying to lose weight or watch your calorie intake, it doesn't mean you have to sacrifice flavor, taste, variety, or the simple pleasures food can bring. Remember "snack time" growing up? It not only helped refuel us between meals but also was fun! But what we didn't realize was that it was also portion controlled—a couple of graham crackers and milk, an apple, or a handful of nuts, for example. And so it is with this book: grab a fast-fix snack in the middle of the morning and then again in the afternoon, just like you used to do. It's a fun and easy way to stay on track, as is the entire book.

How to Use This Book

The recipes in this book are designed to make it easy for you to eat healthy, satisfying food all day long and keep to 1,500 calories a day—without having to count calories or prepare complicated meals. In these pages, you'll find 150 recipes for filling breakfasts; stick-to-the-ribs lunches and dinners; tasty snacks; and delicious, guilt-free desserts. Every day you get to choose three meals, two snacks, and one dessert. Breakfast, plus one snack, plus lunch, plus another snack, plus dinner, plus dessert—all for just 1,500 calories!

All breakfasts, lunches, and dinners are approximately 350 calories each. All snacks and desserts are approximately 150 calories each. So no matter what combination you choose from the various chapters, you'll come up with about 1,500 calories a day. If you cut out the dessert, it can be a 1,350-calorie day, but who wants to give up dessert? There's no need. This is not a diet plan, but rather a delicious way to take you through the day in a healthy way.

This book contains a month's worth of breakfasts, snacks and appetizers, lunches, dinners, and desserts that are calorie controlled to help you stay within weight-loss parameters while getting tons of flavor and nutritional benefits. And they're fast, really fast. Each recipe takes 30 minutes or less to make—and that's not just for one part of the meal, but for the entire meal. There's one main recipe for each meal and purposely simple sides to go along with it.

As in all of my books, all of the recipes are family-friendly but will also satisfy the savvy eaters in your life. You can find all of the ingredients in traditional supermarkets, so no extra grocery runs to specialty food shops are necessary. The ingredient lists are short to keep the shopping, prep, and cleanup time to a minimum. Using high-flavor ingredients, a variety of easy cooking techniques, and multi-ingredient items such as seasoning blends or salsa are just some of the secrets to these great-tasting quick-fixers.

An added bonus is that these recipes are interchangeable! Desserts can be snacks, snacks can be desserts, breakfasts can be lunches, lunches can be dinners. Many dinners can be frozen for other meals down the road or brown-bagged for lunches the next day. It all depends on your mood.

Throughout the Book, You'll Get

- **Recipe and accompaniments:** There's one written recipe for the main course in each meal and a list of recommended side dishes.
- **Streamlined ingredient list:** The lists of ingredients are purposefully kept short for ease in shopping, storing, prepping, and cleaning up. But while the recipes are short on ingredients, they're not short on flavor! If you're counting, they each have from six to eight ingredients, not counting salt, pepper, water, and options.
- **Time-Shaver Tips and Cook's Notes:** I've included helpful sidebars with quick info, such as healthy tips, shortcuts, and quick, general information to keep you "in the know."
- **Total yield and serving sizes:** To make it easier to know how much the recipe will make, I've provided both total yields and serving sizes. The majority of the recipes are designed to serve four, but most can easily be broken down to serve two or even one.
Nutritional analysis: A full nutritional analysis is included per serving for the entire meal and for each component of the meal. (Meal-inclusive nutrition information follows the recipe title; many snacks and the desserts have only individual nutritional information because they do not include accompaniments.) This makes for easy side-swapping, so if you aren't in the mood for one accompaniment, you can easily change it for one you do want, while still being mindful of the calorie count.

These nutritional values were calculated by ESHA Research software or provided by food manufacturers in decimals, which were then rounded out to the nearest whole number. Calculations for an entire meal may appear to vary slightly from the nutritional analysis for individual meal components, but they are accurate based on these exact decimal values.

Nutritional benefits: This feature is my personal favorite. These notes inform you when you're getting an extra boost of fiber, vitamin A, vitamin C, calcium, or iron.

Rating Good and Excellent Sources

In my recipes, whenever a meal contains a good or an excellent source of any of the following nutritional benefits, it reads, "Good source of ..." or "Excellent source of ..."; this will help you stay better informed of what you are actually eating while you're enjoying it. These nutritional values are calculated for the entire meal (main recipe plus side dishes).

The Food and Drug Administration (FDA) has established criteria to help us understand the nutritional benefits and claims of what is a "good" or an "excellent" source of certain vitamins and minerals. The following is a simplified explanation of the whys and wherefores of it all.

To be a good source of vitamin A, vitamin C, calcium, or iron, a serving has to provide at least 10 percent of the recommended daily allowance (RDA), and an excellent source has to provide 20 percent of the RDA.

To be a good source of fiber, a serving has to provide no less than 2.5 to 4.9 grams, and an excellent source yields 5 grams or more per serving.

Vitamin A

Why is it important? It keeps eyes and skin healthy and helps to protect against infections.

What foods provide it? The best sources are dark green leafy vegetables and orange fruits and vegetables. Choose from all fresh, frozen, canned, or dried vegetables and fruits.

What should I look for on the nutrition label? A serving providing at least 10 percent of the RDA is considered a good source of vitamin A; one providing at least 20 percent is considered an excellent source.

Vitamin C

Why is it important? It helps heal cuts and wounds; keeps teeth and gums healthy; helps promote a healthy immune system; and aids in iron absorption.

What foods provide it? Choose from fresh, frozen, canned, or dried vegetables and fruits.

What should I look for on the nutrition label? A serving providing at least 10 percent of the RDA is considered a good source of vitamin C; one providing at least 20 percent is considered an excellent source.

Iron

Why is it important? Iron is a mineral that is essential for carrying oxygen through the blood.

What foods provide it? Among the foods that are relatively high in iron are lean red meat, pork, poultry, fish, soybeans, spinach, beans, and eggs.

What should I look for on the nutritional label? A serving providing at least 10 percent of the RDA is considered a good source of iron; one providing at least 20 percent is considered an excellent source.

Fiber
Fiber

- **Why is it important?** Fiber is important for the health of the digestive system and for lowering cholesterol. It helps give a feeling of fullness with fewer calories.
- **What foods provide it?** Among the foods that are relatively high in fiber are plant-based foods such as fruit, vegetables, whole grains, beans, and cereal products.
- **What should I look for on the nutritional label?** A serving providing at least 2.5 to 4.9 grams is considered a good source of fiber; one providing at least 5 grams is considered an excellent source.

Calcium

- **Why is it important?** Calcium is necessary for building bones and teeth and for maintaining bone mass, possibly reducing the risk of osteoporosis.
- **What foods provide it?** Dairy products are the primary sources. Other, nondairy sources are fortified cereals, calcium-fortified soy beverage, salmon, and dark green leafy vegetables such as spinach and broccoli.
- **What should I look for on the nutritional label?** A serving providing at least 10 percent of the RDA is considered a good source of calcium; one providing at least 20 percent is considered an excellent source.

Free Seasonings

The following seasoning suggestions can add tons of flavor to your dishes—whether entrees, salads, or side dishes—without adding tons of fat!

Keep these spice blends on hand:
- Creole
- Mexican
- Greek
- Lemon pepper
- Italian
- Thai
- Southwestern
- Mesquite
- Moroccan

Use fresh ingredients like these to pick up the flavors of other ingredients:
- Fresh lemon, lime, and orange juice and grated rind
- Grated gingerroot
- Finely chopped green onion
- Finely chopped jalapeño
- Fresh garlic (put through a garlic press for the best flavor)
- Fresh herbs

Note: If you're adding these ingredients to recipes that are being cooked, add them at the very end of the cooking time for peak flavor.

Other products you can use to season salads, veggies, and entrees include the following:
- Salad spritzers
- Hot pepper sauces (There's a wide variety on the market.)
- Salsas and spaghetti sauce
- Butter pump sprays (Be sure to count your pumps—they add up!)
- Butter granules
- Fat-free sour cream
- Fat-free salad dressings
- A small amount of light soy sauce

A Final Suggestion

Although the recipe ingredients are given in volume measurements for the most part, it would be helpful to purchase a small food scale—it's inexpensive and indispensable! It can save you from guesswork about ingredient amounts.
(especially with meats, poultry, and seafood) and easily keeps you on track.

4 cups water
1 tablespoon liquid shrimp and crab boil or to taste, such as Zatarain’s
1¼ pounds raw headless medium shrimp, unpeeled
½ cup fat-free sour cream
2 tablespoons light mayonnaise
2 medium garlic cloves, minced
1 teaspoon grated lemon rind
1½ to 2 tablespoons lemon juice
Louisiana hot sauce to taste
¼ teaspoon salt

Bring the water and shrimp and crab boil to a boil in a Dutch oven over high heat. Add the shrimp, return to a boil, and cook 2 minutes or until the shrimp are opaque in the center. Remove from heat and let stand 2 minutes to absorb flavors. Drain well and place on a sheet of foil or large cookie sheet in a single layer to cool quickly, about 10 minutes.

Meanwhile, combine the remaining ingredients in a small bowl and stir until well blended. Cover with plastic wrap and refrigerate until needed.

When the shrimp have cooled, peel but leave the tails attached. Refrigerate until serving time. Place them on a lettuce-lined platter, if desired, and serve with the aioli.

½ cup no-salt-added tomato sauce
¼ cup chopped fresh basil leaves

½ teaspoon dried thyme leaves
¼ teaspoon dried rosemary, crushed
¼ teaspoon garlic powder
¼ teaspoon paprika
¼ teaspoon salt
¼ teaspoon black pepper
4 pork chops with bone in (1¼ pounds total)
1 teaspoon canola oil

In a small bowl, combine the thyme, rosemary, garlic powder, paprika, salt, and pepper. Sprinkle evenly over both sides of the pork chops, pressing lightly to allow the thyme mixture to adhere.

Place a large nonstick skillet over medium heat until hot, add the oil, and tilt the skillet to coat the bottom lightly. Add the pork chops and cook 5 minutes on each side or until barely pink in the center. Remove from
heat, cover, and let stand 3 minutes to allow juices to release and create a light sauce.

¼ pound ground pork
½ cup matchstick carrots, chopped fine
1 teaspoon grated gingerroot
1/8 teaspoon dried pepper flakes, optional
24 wonton wrappers
2 cups water
2 14.5-ounce cans reduced-sodium chicken broth
2 teaspoons light soy sauce
4 medium green onions, chopped fine (½ cup)

• Combine the pork, carrots, ginger, and pepper flakes in a small bowl and stir to blend thoroughly. Fill the wontons according to the package directions.
• Add the water to a Dutch oven; place a collapsible steamer basket inside. Arrange the wontons in a single layer on the steamer basket—do not stack the wontons on top of each other. Bring to a boil over medium-high heat. Cover and steam 13 minutes (add ½ cup additional water, if needed, after 8 minutes to keep the oven from boiling dry).
• Remove the basket (with the wontons in it) from the Dutch oven. Discard any remaining water. To the Dutch oven, add the broth; bring to a boil over high heat; then add the wontons. (Note: The wontons may stick together. Do not pull them apart; submerge the entire steamer basket containing the wontons in the broth, and they will release immediately.)

Return just to a boil, remove the Dutch oven from heat, and remove the wontons from the broth with a slotted spoon. Place six wontons in each of four shallow soup bowls. Add the soy sauce to the broth, and spoon ¾ cup of the broth over each serving of wontons. Sprinkle evenly with the green onion.

4 medium Yukon gold potatoes, scrubbed and pierced several times with a fork (1½ pounds total)
2 cups small broccoli florets (5 ounces)
¼ cup water
¾ cup fat-free milk
2 teaspoons cornstarch
1 tablespoon diet margarine
1 cup (4 ounces) reduced-fat shredded sharp cheddar cheese or 4 slices American cheese, torn into small pieces
1 to 2 teaspoons Worcestershire sauce
½ teaspoon salt &frac18; teaspoon cayenne

Meanwhile, bring all but 2 tablespoons of the milk to a simmer over medium heat in a medium saucepan. Combine the remaining 2 tablespoons milk with the cornstarch, and stir until cornstarch is completely dissolved. Whisk into the milk in the saucepan and continue to simmer slightly 2 minutes, stirring frequently. Remove from heat and whisk in the margarine until melted. Whisk in the cheese, Worcestershire sauce, salt, and cayenne until the cheese is melted.

3 tablespoons canola oil
1 large egg
1¼ cups old-fashioned-style rolled oats
½ cup all-purpose flour
½ cup granulated sugar
⅛ cup packed light brown sugar
¼ teaspoon baking soda
¼ teaspoon salt
1 cup raisins

- Preheat the oven to 375°F.

- Lightly coat two nonstick cookie sheets with cooking spray. Using a tablespoon measure, spoon six cookies onto each cookie sheet. (Do not put more than six on a sheet, because they will spread while baking.) Bake 6 minutes or until slightly golden on the edges and light in the middle. They will not look done at this point but will continue to cook while cooling. Remove from the oven and let stand on the cookie sheet 3 minutes before removing. Continue with remaining batter.

TIME-SHAVER TIP: Short on cookie sheets and need to cool a hot one down fast? Pop it into your freezer for a couple of minutes.

Peppermint Brownie Splatter Cookies
2 large eggs  
1 tablespoon plus 1 teaspoon canola oil  
2 teaspoons instant coffee granules  
1 10.5-ounce package fudge brownie mix  
12 small peppermint patties, such as York, cut into ¼-inch pieces  
1 tablespoon powdered sugar

- Preheat the oven to 350°F.  
- In a medium bowl, combine the eggs, oil, and coffee granules. Stir until well blended; the coffee granules may not be totally dissolved at this point. Stir in the brownie mix until just blended; the batter will be very stiff. Gently but thoroughly stir the candies into the batter.  
- Liberally coat two large nonstick cookie sheets with cooking spray, or line them with parchment paper. Using a tablespoon measure, spoon 6 scant tablespoons of the batter onto the cookie sheet, leaving about 4 inches between the cookies. Bake 5 minutes or until faint surface bubbles appear (as when cooking pancakes). Cookies will not appear done at this point. Place the cookie sheet on a cooling rack 1 full minute. Coat a flat spatula with cooking spray and gently remove the cookies, placing them directly on the cooling rack to cool completely.  
- Repeat, alternating the cookie sheets to start with a cool sheet each time.  
- When the cookies are cool, dust powdered sugar evenly over them using a fine sieve. Store them in an airtight container with a sheet of waxed paper between layers to prevent cookies from sticking together.

**COOK’S NOTE:** Kids of all ages love these cookies; they’re fun to make, fun to look at, and even more fun to eat.

Grated rind and juice of 1 medium orange
2 tablespoons canola oil
4 cups sliced strawberries
2 ripe mangoes, peeled, seeded, and chopped (about 2 cups)

9 dried apricot halves, chopped
3 tablespoons water
2 teaspoons grated orange rind
1 8-ounce package reduced-fat crescent dinner roll dough
Liquid butter spray, such as I Can’t Believe It’s Not Butter
2 teaspoons sugar
½ teaspoon ground cinnamon

- Preheat the oven to 375°F.
- Place the dried fruit, water, and orange rind in a microwave-safe bowl, cover with plastic wrap, and microwave on High for 1 minute. Stir and place on a dinner plate in a thin layer (along with any liquid) to cool quickly and allow the liquid to be absorbed; let stand 5 minutes, stirring frequently. (Note: Do not remove the dough from the refrigerator until the 5 minutes have passed.)
- On a clean work surface, unwrap and gently unroll the dough, keeping it in one piece—do not separate the dough. Spread the fruit mixture evenly over it. Starting on one of the long ends, roll up the dough, creating a long log. With seam side down and using a serrated knife, gently cut the dough into 12 slices, about ½ to ¾ inch each.
- Coat a nonstick baking sheet with cooking spray, place the dough "wheels" on the baking sheet, and bake 11 minutes or until golden. Spray each wheel with butter spray (1 spray per wheel); place the sugar and cinnamon in a fine sieve and sprinkle sugar mixture evenly over all. Serve immediately for peak flavor.

**COOK’S NOTE:** When rolling up the dough to form a log, the seams may separate slightly. Tap them with your fingertips and they will seal easily. Don’t handle the dough too much or it will become tough.

• Combine the remaining 2 tablespoons water with the cornstarch and stir until completely dissolved; add the lemon rind and stir into the liquid in the skillet. Bring to a boil over medium-high heat and boil 1 minute, stirring frequently. Pour evenly over the pear halves and sprinkle berries on top. Serve hot, at room temperature, or chilled.

TIME-SHAVER TIP: Grated lemon rind may be stored in plastic wrap in the freezer to keep on hand for dishes like this one.

Excellent source of fiber and vitamin C
Makes 8 pear halves plus ¾ cup sauce total
Serves 4 (2 pear halves, 3 tablespoons sauce, and ¼ cup blueberries per serving)
Hot Butterscotch Apples and Ice Cream

Calories 150; total fat 0g (saturated fat 0g); protein 3g; carbohydrates 37g; fiber 3g; cholesterol 0mg; sodium 85mg; vitamin A 6%; vitamin C 6%; calcium 8%; iron 2%

3 medium tart apples, such as Granny Smith, sliced (3 cups)
2 tablespoons raisins
2 tablespoons water
¼ teaspoon vanilla extract
3 tablespoons butterscotch or caramel ice-cream topping
1 ¼ cups fat-free vanilla ice cream

- Heat a large nonstick skillet over medium-high heat, and coat the skillet with cooking spray. Add the apples and raisins, coat them with cooking spray, and cook 8 minutes or until beginning to brown lightly, stirring frequently with two utensils as you would a stir-fry.
- Remove from heat, add the water and vanilla, and toss to blend. Drizzle the ice-cream topping evenly over all (do not stir), cover, and let stand 3 minutes to absorb flavor and soften slightly.
- Spoon equal amounts of the ice cream into each of four dessert bowls and top with equal amounts of the apple mixture.

**COOK’S NOTE:** Using a tart Granny Smith rather than a milder, sweeter apple variety gives a bit of contrast, boosting and defining the flavors instead of blending them.

Good source of fiber

Makes 2 cups apple mixture and 1 ¼ cups ice cream total
Serves 4 ( ⅓ cup ice cream and ½ cup apple mixture per serving)

Sour Cherry–Almond Pear Parfaits

Calories 150; total fat 2.5g (saturated fat 0g); protein 5g; carbohydrates 28g; fiber 3g; cholesterol 0mg; sodium 55mg; vitamin A 15%; vitamin C 10%; calcium 15%; iron 10%

1 14.5-ounce can sour pitted cherries in their own juice, undrained
1 large ripe pear, peeled, halved, cored, and diced (about 1 ¼ cups)
3 tablespoons pourable sugar substitute, such as Splenda
¼ teaspoon almond extract
2 6-ounce containers light vanilla yogurt (1 ½ cups total)
2 tablespoons sliced almonds, toasted and crushed

- Combine the cherries and juice, pear, sugar substitute, and almond extract in a medium bowl; toss gently yet thoroughly to blend. Let stand 5 minutes to absorb flavors.
- To serve, place equal amounts in each of four parfait glasses or dishes, top with equal amounts of the yogurt, and sprinkle evenly with the almonds.
COOK’S NOTE: Crushing the almonds helps distribute the rich flavor more evenly, giving an overall nutty flavor rather than a chunky texture to the dish.

Good source of fiber, vitamins A and C, calcium, and iron

Makes 2½ cups cherry mixture, 1½ cups yogurt, and 2 tablespoons almonds total
Serves 4 (scant ⅔ cup cherry mixture, about ⅓ cup yogurt, and 1½ teaspoons almonds per serving)

**Cooking Temperature Conversions**

**Celsius/Centigrade**

0°C and 100°C are arbitrarily placed at the freezing and boiling points of water and are standard to the metric system.

**Fahrenheit**

0°F is the stabilized temperature when equal amounts of ice, water, and salt are mixed.

To convert temperatures in Fahrenheit to Celsius, use this formula:

\[ C = (F - 32) \times \frac{5}{9} \]

So, for example, if a recipe calls for 350°F and you want to convert that temperature to Celsius, you would calculate it like this:

\[
(350 - 32) \times \frac{5}{9} = 176.65°C
\]
